Leandro Simões

Senior Full-Stack Developer (Front-End Focused) | React • Next.js • Vite • TypeScript • Node.js
Zaandam, North Holland, Netherlands

Summary

I am a Senior Full-Stack Developer with a strong front-end focus, dedicated to crafting high-performance, visually polished web and mobile products. While my passion lies in building exceptional user experiences using modern JavaScript frameworks, I bring heavy-duty backend capabilities to ensure seamless end-to-end delivery. I also actively leverage AI-driven workflows to supercharge development efficiency and engineering creativity. Core Expertise- Front-End (Primary Focus): React, Next.js, Vite, TypeScript, TailwindCSS, Styled-Components, Capacitor- Back-End & Databases: Java (Spring Boot), Node.js, C#, Node.js, MS SQL Server, MySQL, Mongodb- Tools & Testing: Git, GitHub Actions, Vitest, React Testing Library, Cypress, NPM/ Yarn/Bun- AI-Driven Development: CloudCode, GitHub Copilot (leveraging AI to accelerate shipping times) About Me- Collaborative Mindset: A friendly, growth-oriented team player who welcomes constructive feedback and thrives on continuous learning.- Languages: Professional English proficiency | Currently learning Dutch (Beginner)."I would rather die of passion than of boredom" – Vincent van Gogh

Experience

Ex Machina Group
Full Stack Engineer
September 2025 - Present (1 year 3 months)
Amsterdam-Noord, North Holland, Netherlands

At Ex Machina Group, I work as a Full-Stack Engineer with a UI/UX & Front-End Specialization, building innovative web and hybrid mobile applications. While my primary focus is delivering high-quality user interfaces using React.js, Redux, Motion, and Capacitor, I also actively support the backend team with Java and Spring Boot development to ensure seamless end-to-end feature delivery.

CLIQ Digital

3 years 2 months

Senior Full Stack Engineer

February 2024 - September 2025 (1 year 8 months)

Amsterdam, North Holland, Netherlands

CLIQ Digital is a company that markets all-in-one streaming subscriptions, bundling films, music, audiobooks, sports, and games through data-driven performance marketing.

At CLIQ, I work with the latest versions of ReactJS and NextJS to build and optimize the entire marketing flow for our streaming subscription portals. This includes developing SEO-optimized landing pages, implementing payment flows using third-party gateways, and building the streaming portals themselves — where users can consume a variety of content, manage their subscriptions, and enjoy a seamless experience. I also have the oportunity to experiment working in a AI-driven workflow by using AI as development tools and applications integrations with GenAI APIs.

Full Stack Developer

August 2022 - February 2024 (1 year 7 months)

Amsterdam, North Holland, Netherlands

SimplificaCI

Senior Full Stack Engineer

September 2016 - July 2022 (5 years 11 months)

São José do Rio Preto, São Paulo, Brazil

SimplificaCI is a company committed to solving problems related to communication between employers and their employees using various tools including Mobile and Desktop Applications, a TV Device, and Email, all managed and measured using a complete Web platform

Working using some technologies like C#, HTML, CSS, Javascript, Typescript, JQuery, Reactjs, and React-Native that is divided on multiple applications for Web and Mobile.

Responsible for fixes on the legacy code base and for implementing many of the new features that exist today on the Web application, creating the database structures when necessary, coding the back-end, and the front-end as well.

Responsible for the creation of the Mobile App from scratch, and I am still fully responsible for the maintenance of the application for both platforms, Android and iOS. I decided to create the application using React-Native, together with Redux, CodePush, and Typescript. Today both, the company and I, know that was the best decision for the business at the time and still being, because of the fast development for both platforms, Android and iOS, with good quality, and easy maintenance.

Responsible for the development of the Web API that is consumed by the mobile application, back-end, and database. This API was created using ASP.NET Web API, C#, and MS SQL Server.

Netspeed Sistemas
Senior Full Stack Engineer
April 2016 - November 2017 (1 year 8 months)
São José do Rio Preto, São Paulo, Brazil

Netspeed is a company that has many applications for accountants, human resources, sales and much more. The company has clients all over the country, a company that really cares about their clients and employers as well.

Working using some technologies like C#, HTML, CSS, Javascript, JQuery, Knockoutjs, Reactjs, and React-Native working on Web, Desktop and Mobile Applications.

As long I start to work at the company, I got two new projects to manage and build. The first one was a RESTful API to integrate multiple application provided by the company and share some information between them.
The second one was a Mobile App from scratch, using React-Native.

I was able to present and teach some technologies for the developers from Netspeed like Knockoutjs, and React-Native.

Grupo WebPic
Full Stack Engineer
September 2009 - April 2016 (6 years 8 months)
São José do Rio Preto, São Paulo, Brazil

WebPic works with applications to improve the management of manufacturing industries, helping in the management of supplies, storage, manufacturing process, and sales.

Working using some technologies like C#, Entity Framework, MS SQL Server, HTML, CSS, Javascript, JQuery, and Knockoutjs working on desktop and web commercial and industrial applications.

Learned a lot since this was my first company working as a Full Stack Developer followed by another 8 years in the company.

Worked on one project from scratch, planning the product, the database structure, followed by the whole development and release of the first version, and several other versions after that. Is glad to see that this project is the main product of the company these days called Indust Web.
